

- Location:
Dąbrowa Łużycka
- Year:
2001
- Installed capacity:
1,312 MW
- Type:
Run-of-river power plant
- River/Lake:
Nysa Łużycka
- Object type:
Elektrownia wodna

The plant was erected on the right bank of the Nysa Łużycka River, at a gate weir. Destroyed during World War 2, the plant was rebuilt and relaunched in 1962. PGE Energia Odnawialna S.A. modernised the facility again in 2003–2004.
