

Energia Odnawialna S.A.

Location: Siedlec

Year: 1905/1933

Installed capacity: 1,387 MW

Type: Run-of-river power plant

River/Lake: Nysa Łużycka

Object type: Elektrownia wodna

The power plant is located in the town of Siedlec. The gate-controlled weir and the power house were built in 1905. Dammed up water is diverted to the plant via a 1,320 m canal. At present, the plant is equipped with three turbines – two Francis units and a Kaplan unit.
